

In breve la biologia

by gibbina, mantiona, ale e zizza .

osservazione al microscopio

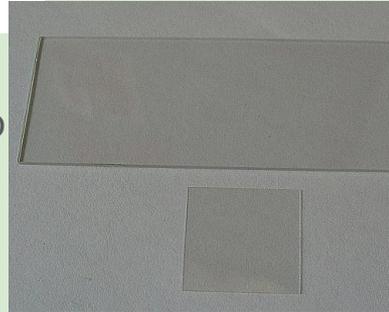

da che cos'è composto il microscopio?

-oculare

-vetrino portaoggetto e coprioggetto

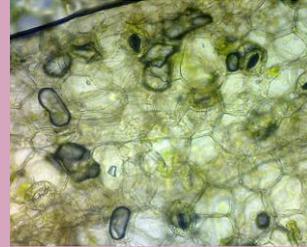

Abbiamo osservato:

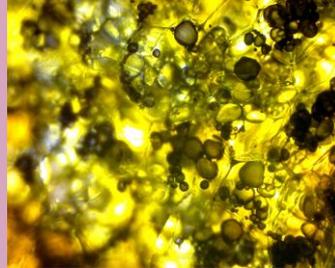

1) cellule vegetali della cipolla

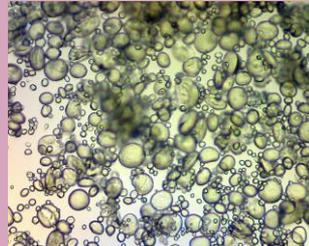

2) stomi delle foglie (apertura per traspirazione)

3) granuli di amido di patata

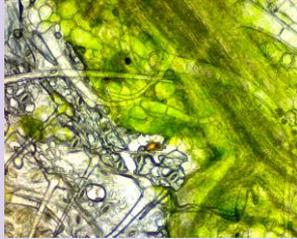

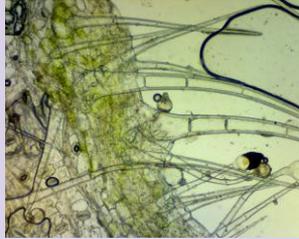

4) granuli di amido di frumento

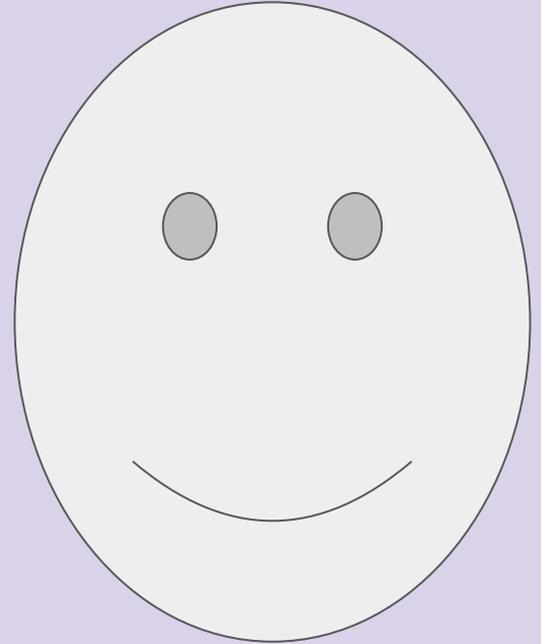

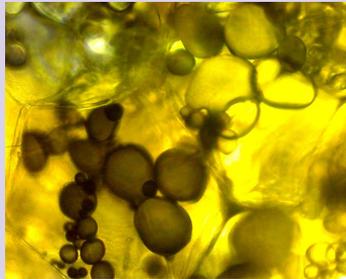

Poi abbiamo analizzato

pellicole di foglia di geranio

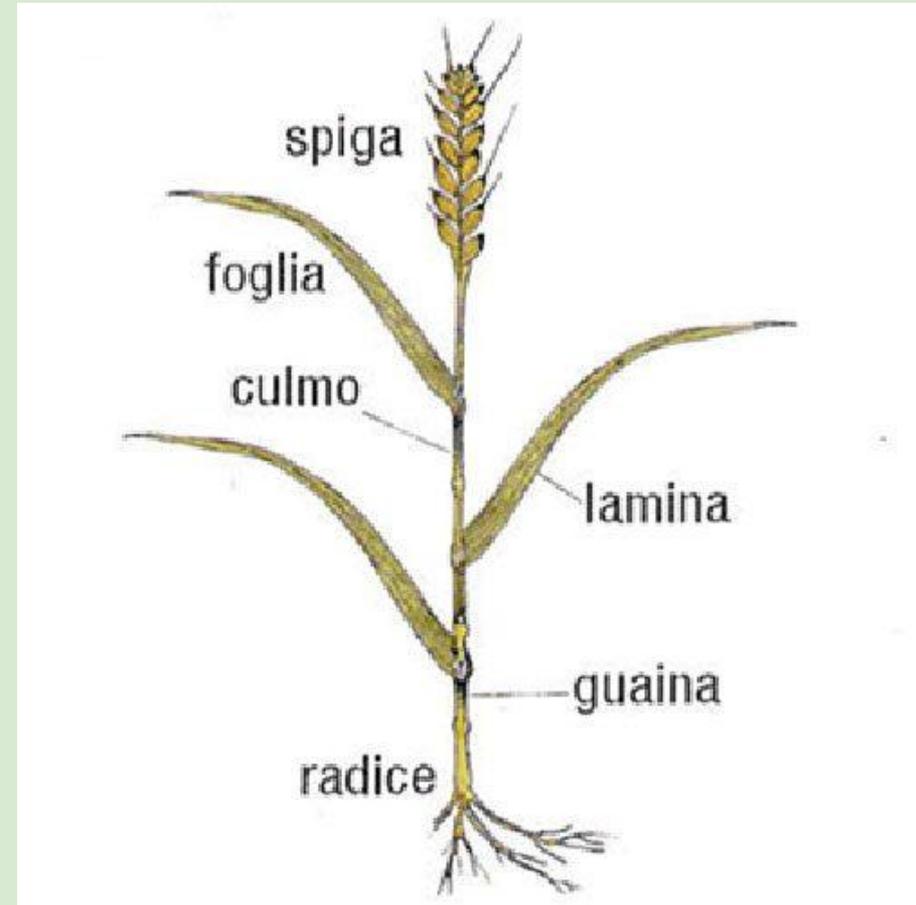

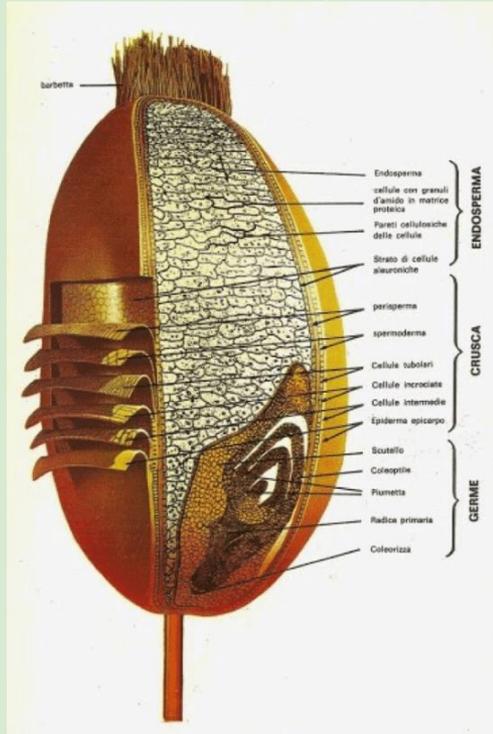

granuli di amido di
patata con tintura di
iodio che diventa blu

Poi abbiamo pure analizzato

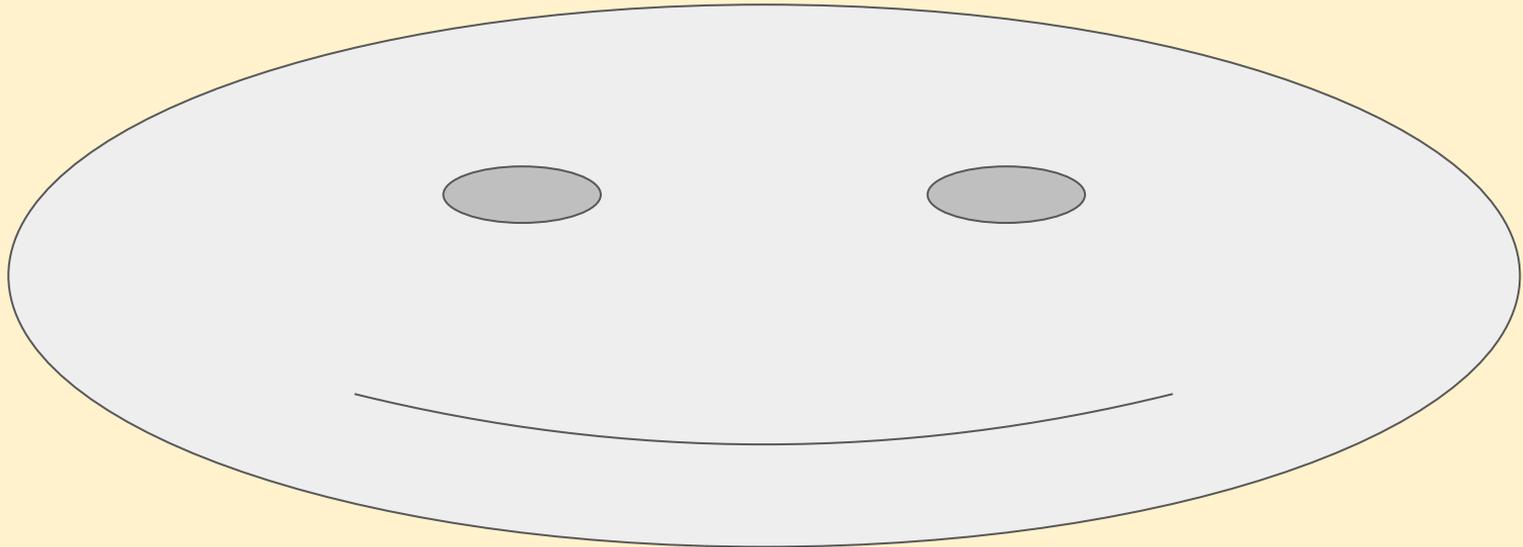

Il grano della famiglia delle graminacee

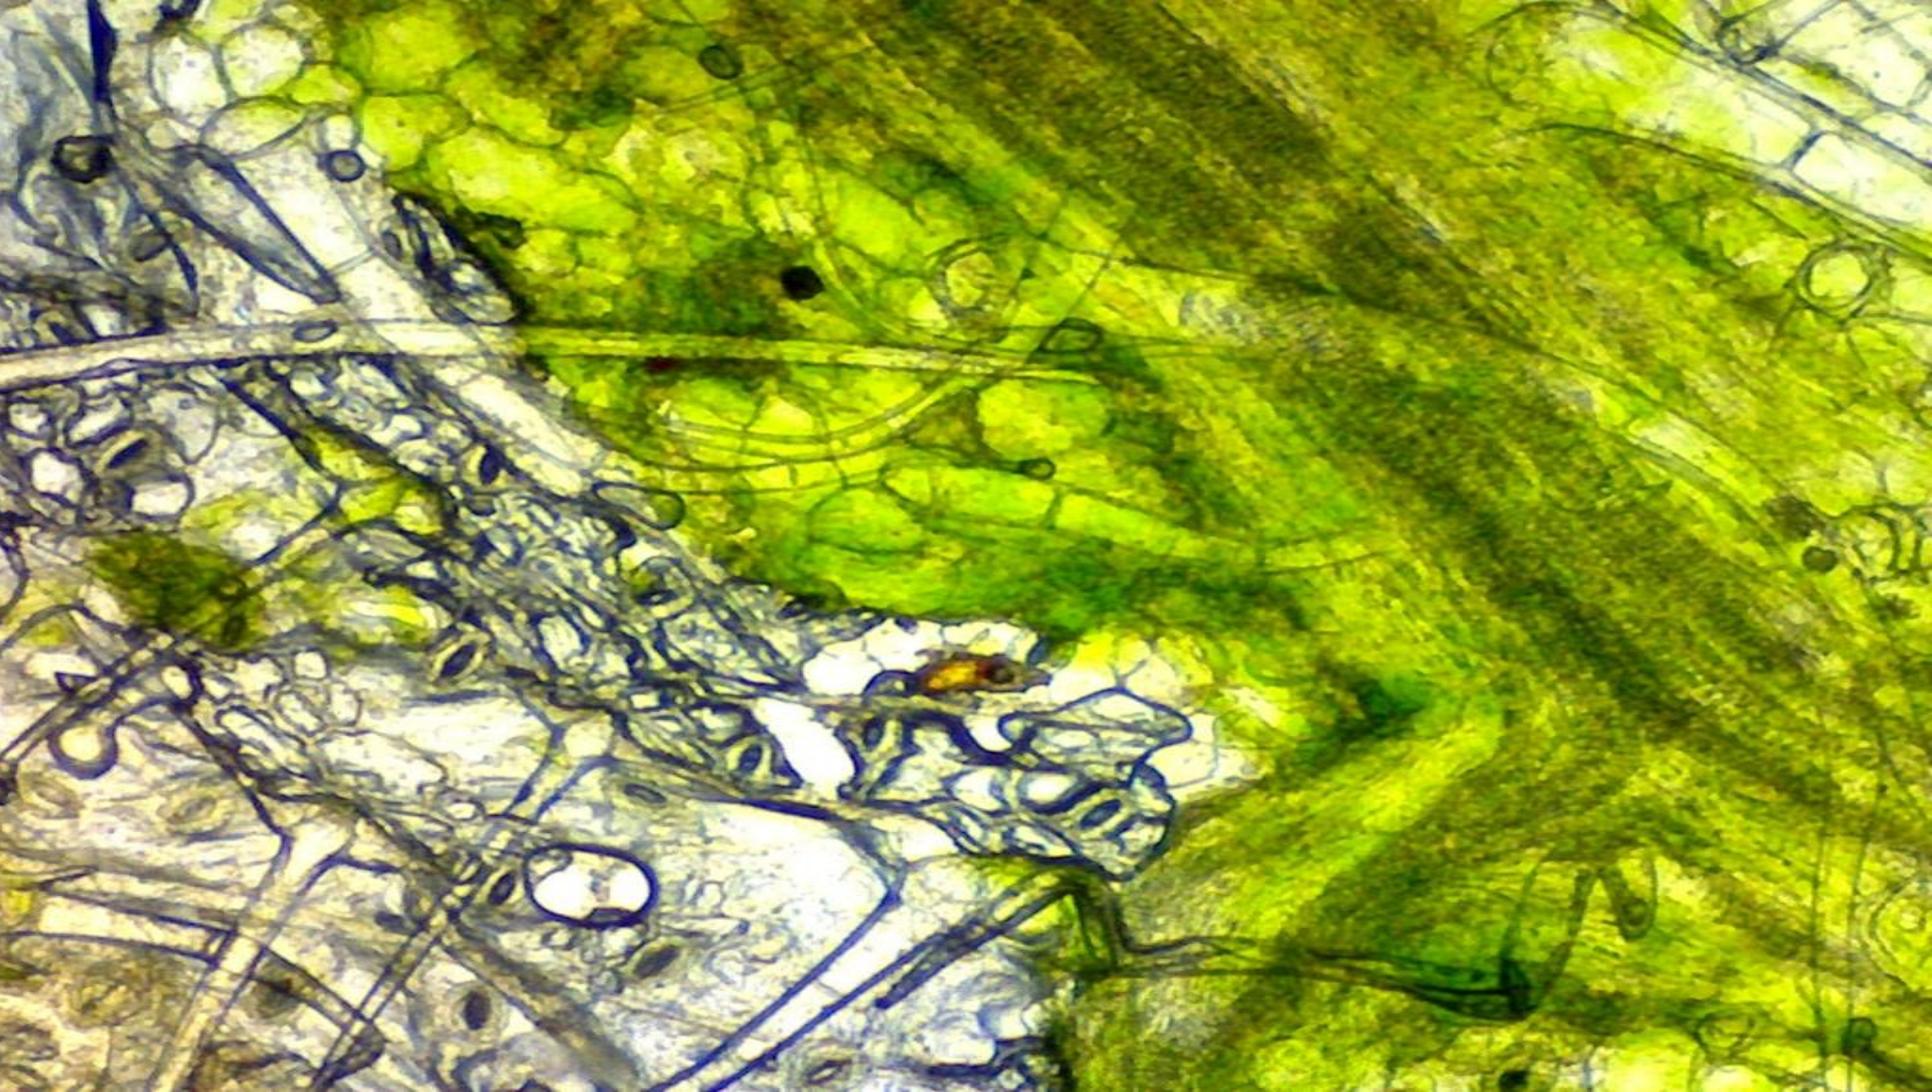

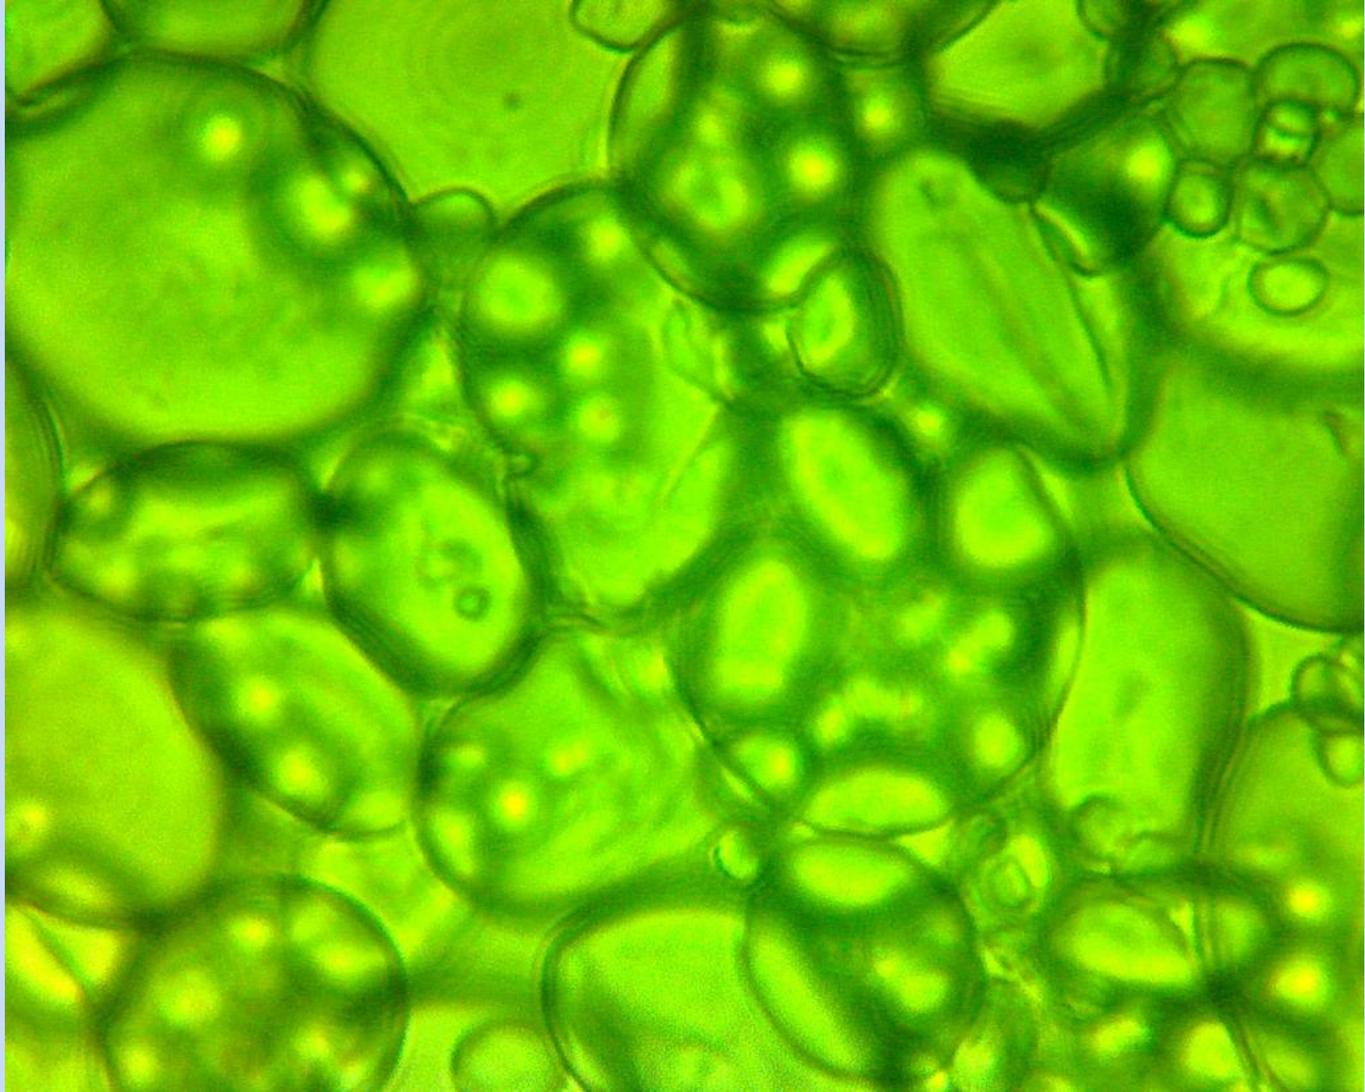

gioco: che cosa è nell'immagine?

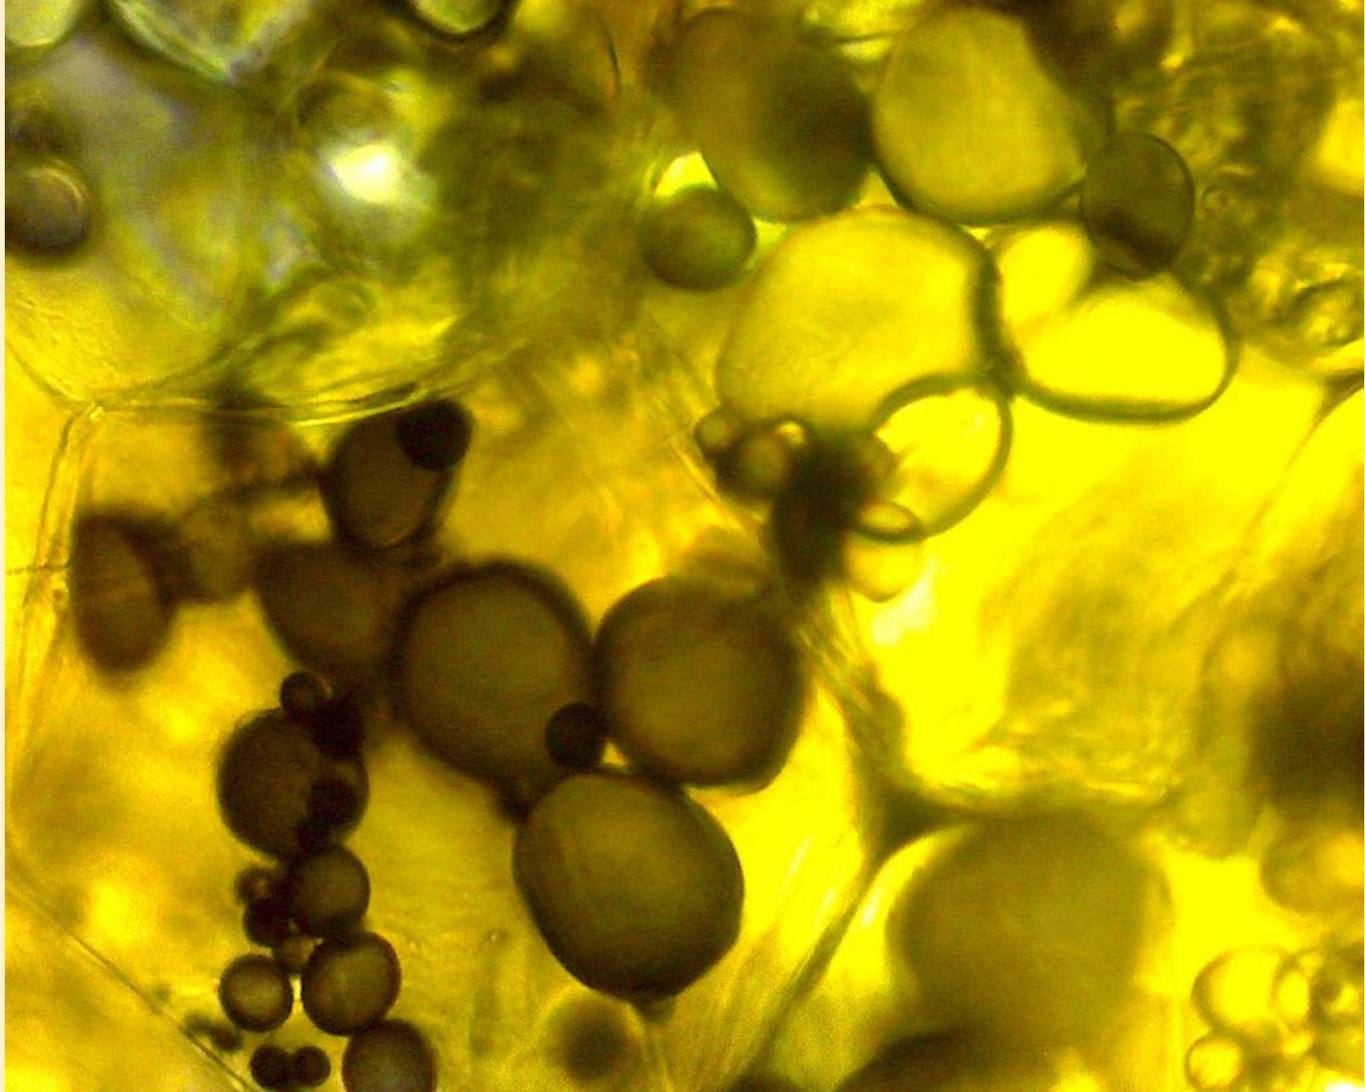

il gioco consiste nel capire che cosa è fotografato nelle immagini

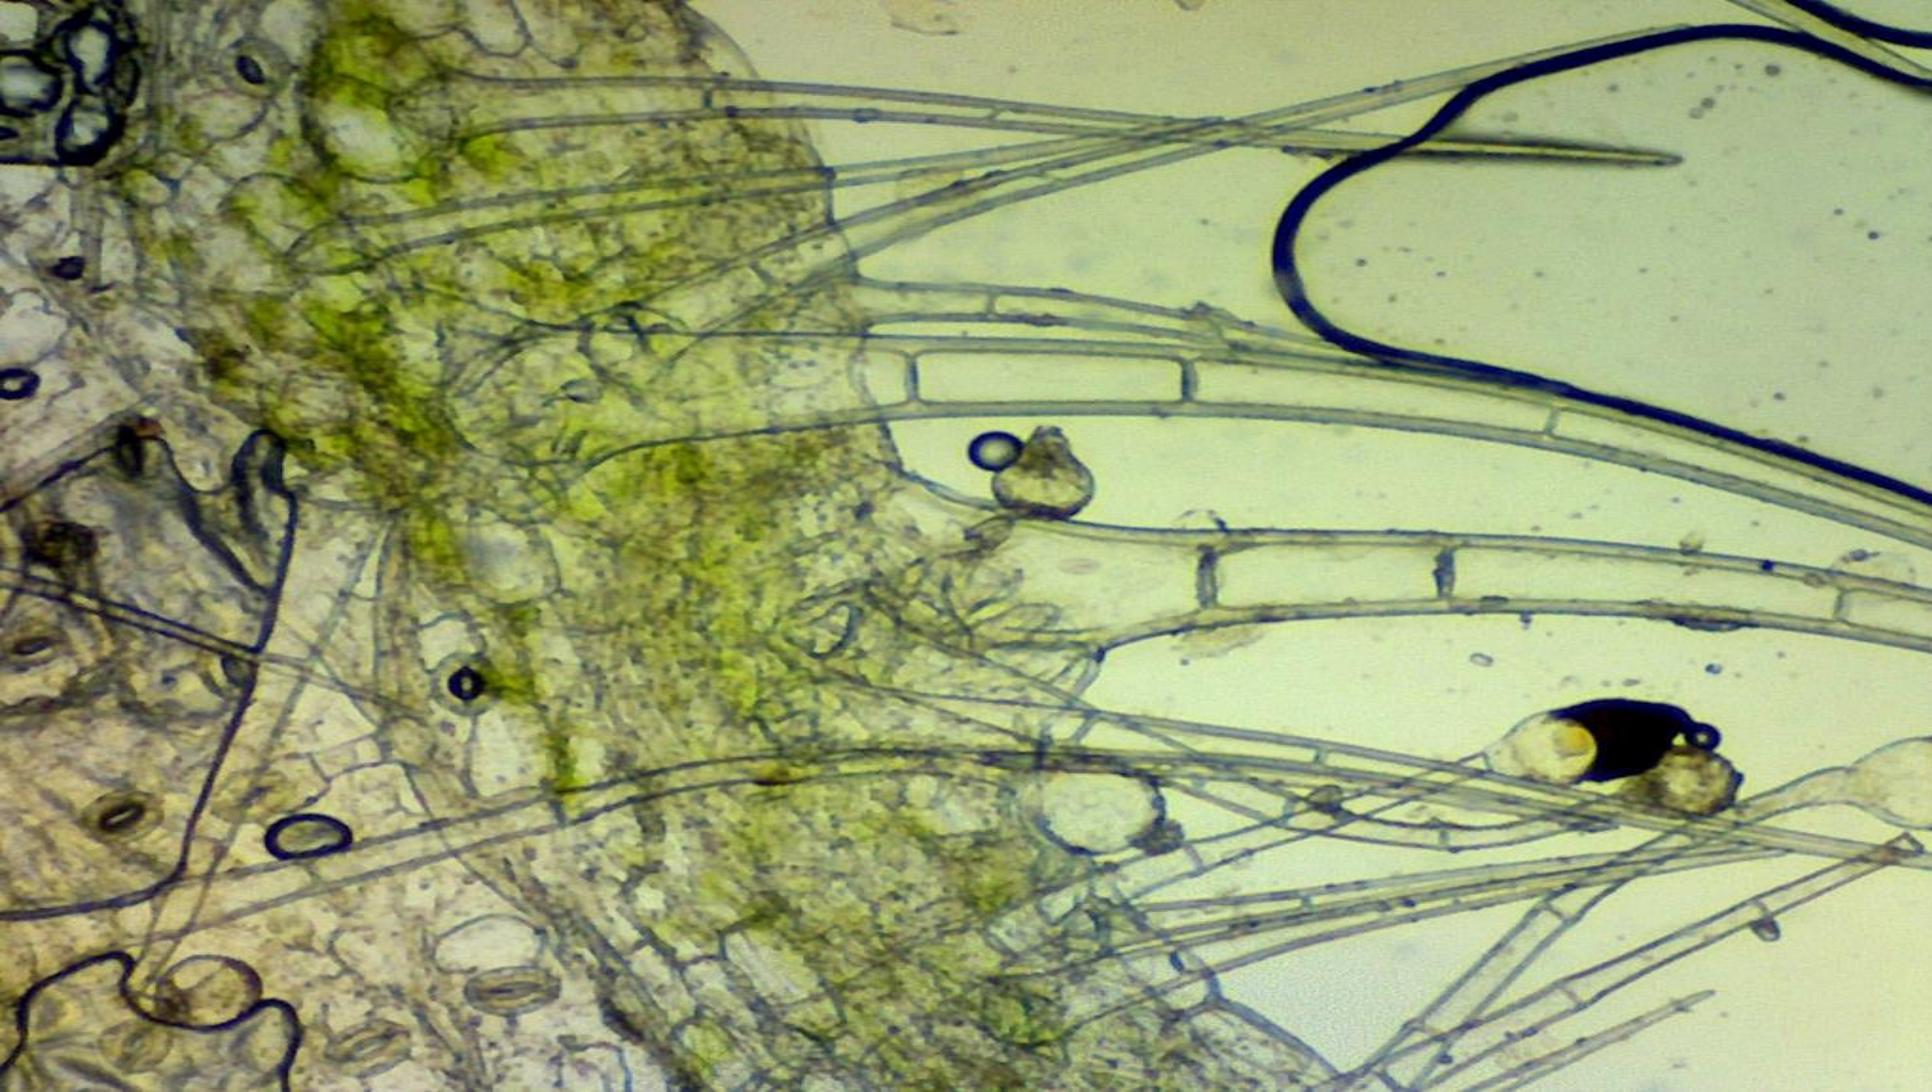

BUON DIVERTIMENTO

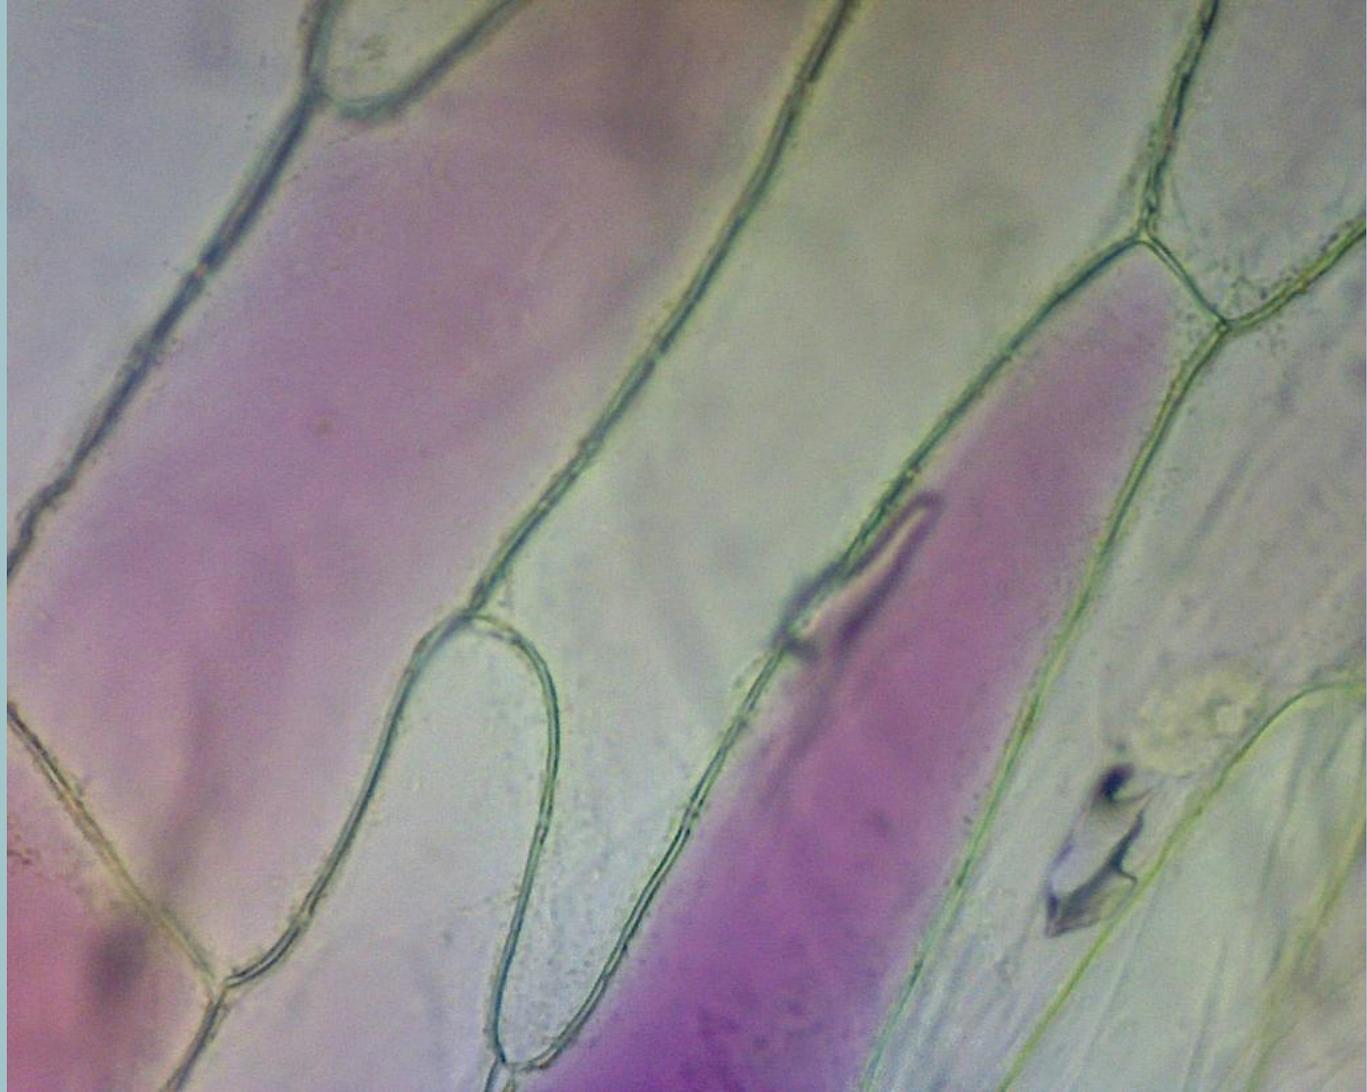

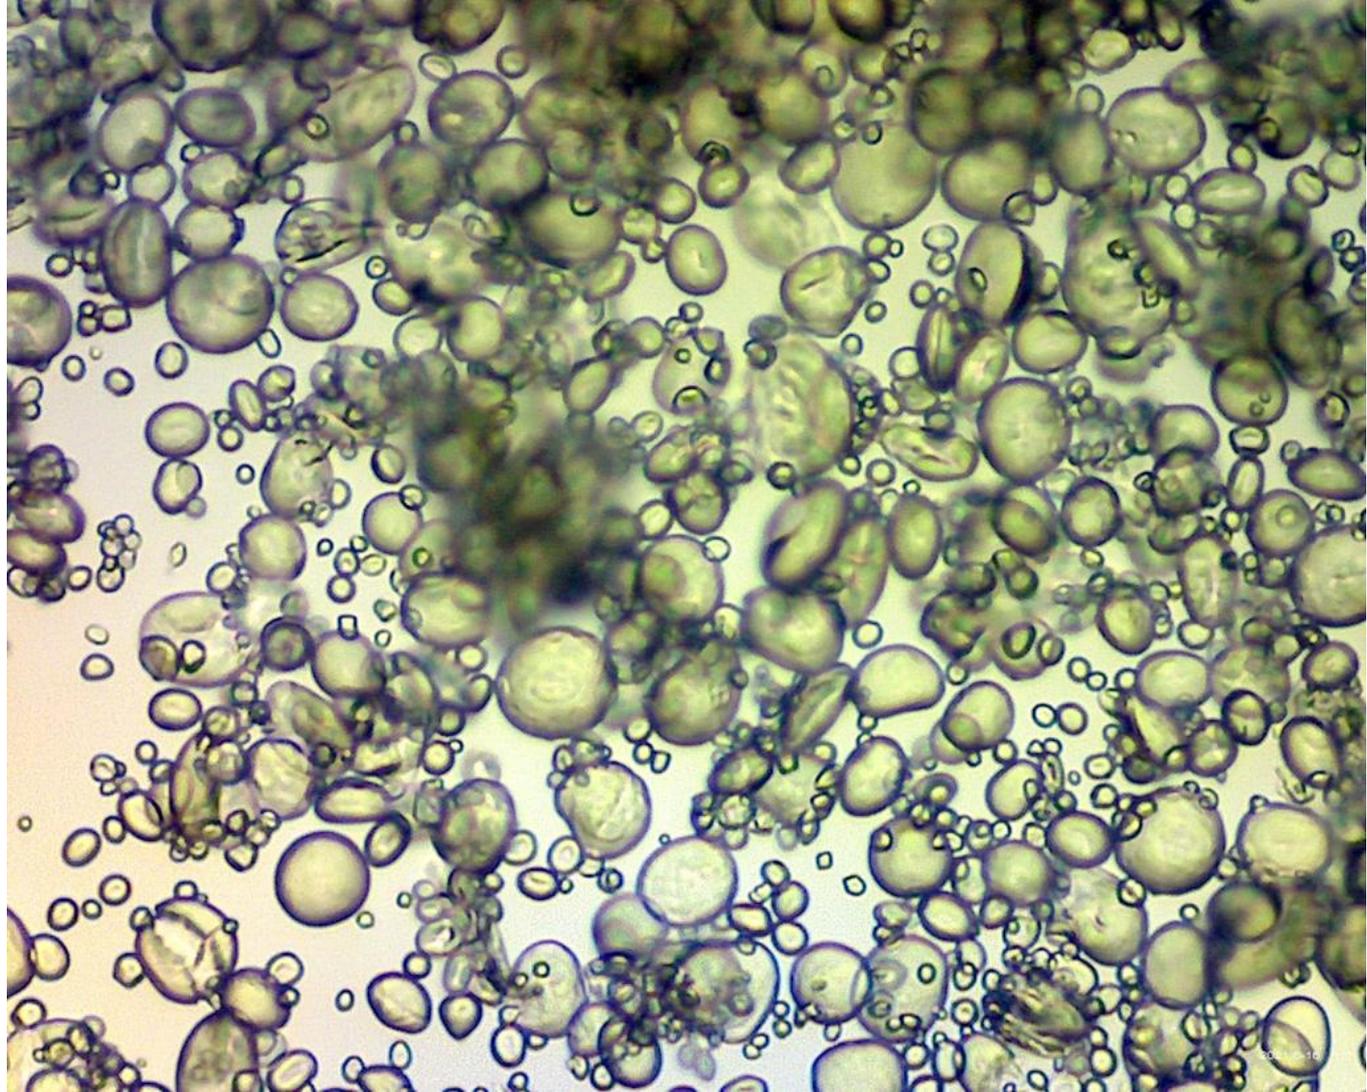

GRAZIE PER L'ASCOLTO
